

Park and Trail Closures As Cleanup Begins on Kalamazoo River

EPA work areas in and near the Kalamazoo River that should be avoided.

Remediation of the Kalamazoo River is expected to begin in March and take approximately 3 years to complete.

During this work, EPA is asking the public to <u>avoid river use</u> from Gull Road to downstream of East Mosel Avenue for the duration of the project. Further upstream remediation to follow at a later date.

In coordination with the City of Kalamazoo and Kalamazoo County, Verburg Park will be closed from March 2022 through April 2023. The Kalamazoo River Valley Trail will be closed and rerouted from Gull Road to Paterson Street.
